ELECTRIC FLOOR HEATING MAT

PERFECT FOR

Direct Nail Down Installation

Direct Glue Down Installation

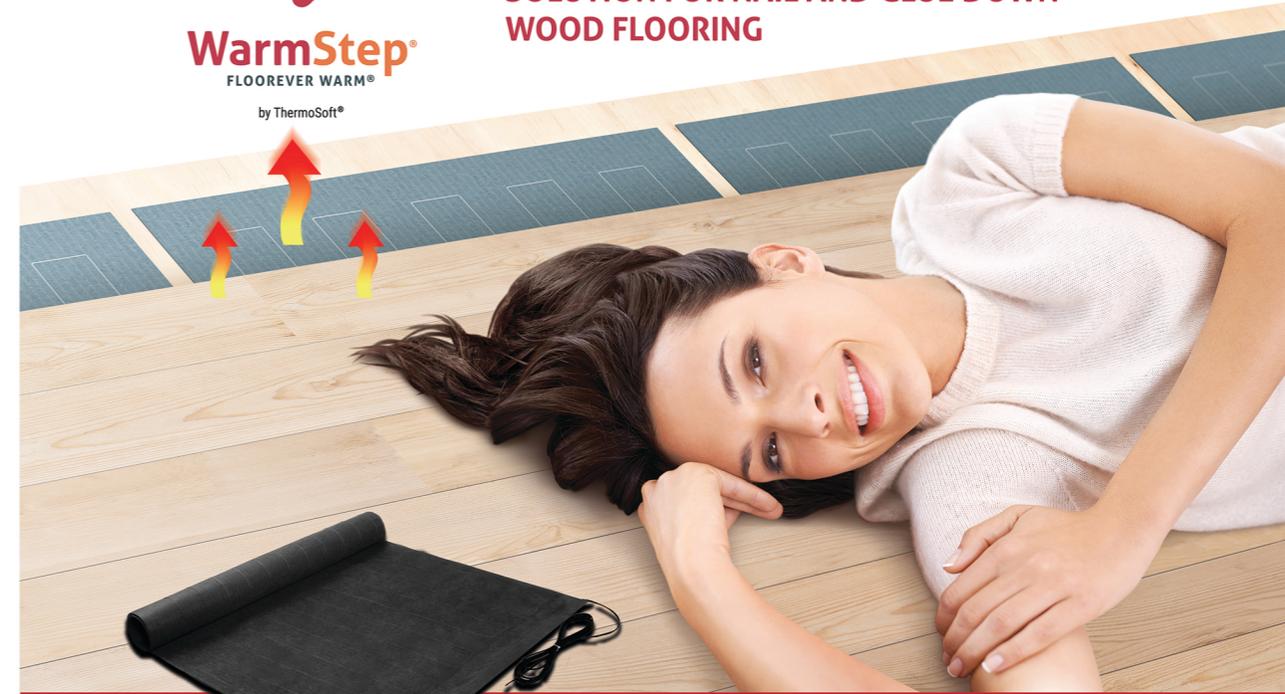

Floating Installation

WarmStep®
FLOOREVER WARM®
by ThermoSoft®

THE ONLY NON-EMBEDDED HEATING SOLUTION FOR NAIL AND GLUE DOWN WOOD FLOORING

BENEFITS

- Provides all the health advantages of radiant heat.
- No drafts or blowing of dust, dirt & allergens.
- Saves energy up to 40% over convection-type heating systems.
- Allows to individually control warmth in any room, addition or basement.
- Maintenance-free and long-lasting safe technology.
- Pairs with data loggers for moisture and temperature recording.
- Built-in thermal cut off Fiberthermics® technology to prevent overheating.

APPLICATION

- An electric radiant floor heating system designed to gently heat floors.
- Perfect for solid and engineered wood floors.
- Ideal for new construction or remodeling.

THE EASIEST TO INSTALL HEATED FLOOR

- Installs without embedding in cement.
- Perfect for direct nail and glue down installations.
- Compatible with most underlayments, vapor barriers, and subfloors.
- Ultra-thin, breathable, permeable construction.
- The best support support and comprehensive warranty.
