

Snow Melting Cables & Mats

Finally, those hours spent shoveling heavy snow in frigid, harsh temperatures are long-gone. Instead of risking dangerous slips or damaging falls, just turn the system on and let the magic of electric radiant heating work for you. Installation is easy and can be done in asphalt, concrete, or under pavers. Keep your pavement and hardscapes free of snow and ice all year long!

Cables

Mats

- Loose cable offers maximum flexibility and application
- Versatile layout options
- Most cost-effective option
- Durable cable designed to last for years

- 18" wide mats and 4" spacing allow tire track driveway coverage where formerly prevented by amp restrictions
- Perfect for tire track melting
- Mats reduce installation time

Controls

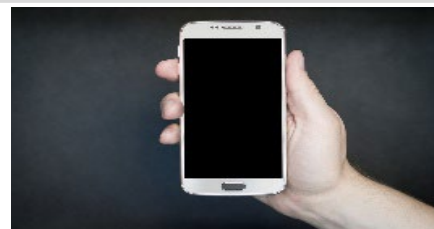

Features and Benefits

- Proven brand-name components
- Outdoor rated sensors
- Options for virtually any project and budget

- Ideal for residential/commercial walkways, steps, and driveways
- Installs in concrete, asphalt or under pavers
- ETL and UL listed/compliant
- Reduces liability risk
