

Celebrating creativity

American Photographic Artists has been celebrating visual creativity since our founding in 1981. Throughout our history, we've seen many trends come and go. But we've also seen technology change the way our craft is practiced, from the migration from analog to digital, and the recent adoption of motion. There's one resilient, flexible strand of thread that connects the past 44 years and that's **creativity**. The tools and workflows have changed, but the artist who can take the ordinary and make the extraordinary endures.

This is our tenth annual Sourcebook showcasing our members' creativity in specialties ranging from food, beauty, and lifestyle to industrial, architecture, and more.

This stunning collection of images will inspire you and remind you of APA's consistent dedication to visual artists for over forty years.
