

## Simplify, Secure, and Save: Effortless Microsoft 365 Data Resilience

Ensure your Microsoft 365 data is always accessible, secure and doesn't break the bank.

### Solution Overview

Managing backup for Microsoft 365 presents challenges including complexity due to numerous applications like Exchange Online and SharePoint Online, potential data loss from misaligned default retention policies, risks of accidental deletions, and vulnerability to cyber threats like ransomware. Despite Microsoft's security measures, complications from compliance requirements, and additional costs for advanced backup features can make managing Microsoft 365 demanding and expensive.

CrashPlan and Backblaze deliver a streamlined, cost-effective, and highly secure solution for Microsoft 365 users of any scale. Our platform ensures comprehensive protection and management across your entire Microsoft 365 environment, reducing the risk of data compromise with multi-cloud backup and archive locations.

### Challenges We Solve

- **Data Security:** Overcome single points of failure by finding a secure alternative to Azure backup.
- **Cost-Effective Scalability:** Navigate the complexities and high costs of Azure storage and scale with ease with predictable pricing.
- **Data Management:** Implement 3-2-1 backup within a cloud environment for seamless backup management.
- **Cyber-Resiliency:** Ensure data resilience across devices and locations with flexible backup options.

### Top Benefits

- **Unified Data Protection:** CrashPlan and Backblaze provide a single backup solution for all Microsoft 365 data.
- **Robust Security:** Meet stringent compliance requirements with encryption, access controls, and audit trails.
- **Multi-cloud Backup:** Ensure data integrity with backup across multiple cloud locations.
- **Quick Recovery:** Minimize downtime with granular recovery options for swift data restoration.

## Seamless Security, Unrivaled Efficiency: Your Trusted Data Guardians

### About CrashPlan

At CrashPlan, we take data preservation seriously. In a completely digital world and economy, data is not just bits and bytes for our users, it's innovations, ideas, and advantages that are critical in keeping the world progressing and developing. Our work in the world is to protect your work in the world.
