

PROFESSIONAL RESEARCH CONSULTING

## Effective Solutions for Your Project!

We provide advanced scientific computing expertise to businesses, governments, individuals, and universities.

### TRUST

## Our Experience

For almost 20 years, our highly-skilled transdisciplinary team of experts, from leading research universities and industry, has been solving our clients' research challenges.

- ✓ Our extensive experience with a wide range of cutting-edge methods and technologies can help ensure your project's success, with high-quality deliverables provided both on time and within budget.
- ✓ Whether you need help with every aspect of a new project, including coordinating complex projects, or one part of an ongoing project, we can be an integral part of the collaboration.
- ✓ We follow all U.S. Department of Health & Human Services standards for the security of electronic protected health information (HIPAA-compliant).

Experienced with experimental and real-world data, including: Addiction · Agricultural · Alcohol · Alzheimer's · Asthma · Birth Defects · Cancers · Cardiovascular · Dementia · Diabetes · Hormones · Metabolism · Nicotine · Opioids · Stroke · Substance Use · Veterinary
