Were you once again in the North west? Violet called to ask whether you've moved away from LA address.

Believe it or not, this is being scribbled at JFK before we depart for a 3 week visit to our friends in Switzerland for six days, the balance of the time ~~to~~ to be spent in Paris. It's our 40th wedding anniversary trip already postponed for nearly two years.

Trust "the Bug Hives" is doing well. As always, our love to Sam Chew and Dana. Especially to Big Daddy!
