

WAR RELOCATION AUTHORITY
GILA RIVER PROJECT
RIVERS, ARIZONA

July 22, 1944

To Whom It May Concern:

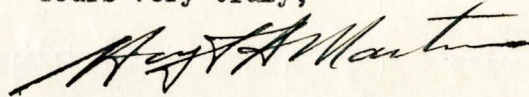

This will introduce Mr. Fred Takano who recently has completed the mechanical installation of the canning factory here on the project.

This man has done a very excellent job on the installation of the steam boiler which furnishes steam and power for the entire food processing section. Mr. Takano did an excellent job in supervising the installation of the entire plumbing system and automatic boiler controls.

The writer has become well acquainted with this man and knows him to be a very capable and trustworthy person. I am confident he will continue his abilities and trustworthiness to his next employer as well as he did while in our employ.

I am pleased to recommend this man.

Yours very truly,

Hoyt A. Martin
Mfg. Supt.
Gila River Project
