Break in Water Pipe Repaired

Repair on a serious break in the pipeline, which caused water shortage for three days, was completed late Friday afternoon, Ben B. Lummis, project engineer, announced. The break was caused by the contraction of the welded joints in the pipe between the center and reservoir. The pipe was laid in the heat of last July, it was explained.

A huge hole was dug around the break to facilitate repair work. To prevent it from filling with water the reservoir was emptied.

Due to the difficulty in maintaining an exact balance between the supply and demand, water shortages were occasioned at times in blocks with high elevation.

To clarify a situation which arose some time ago after a notice in the bulletin, the office of Dr. Charles E. Irwin, chief medical officer of this center, today issued a statement of correction in regard to the dental services now available to colonists.

Dr. Wilfred Hanaoka, speaking for Dr. Irwin's office, said that both soldiers and center residents will be taken care of at the hospital dental clinic. Because of lack of proper tools and instruments and necessary materials, the soldiers who were cared for at the hospital were treated only on a prophylactic basis. "Some soldiers were sent to the dental clinic at L-26 because of lack of material at the hospital clinic," Dr. Hanaoka said.

Patients living near the hospital or anyone desiring dental service may go to either the hospital dental clinic or to L-26, Dr. Hanaoka declared. Dental clinic hours are from 8 a.m.-12 M. and 1-5 p.m. daily except Sundays.
