THE GOAL OF EDUCATION IN A DEMOCRACY

In a democracy, a symmetrical training of the individual is all important. In the high schools of Oakland, the object of our work is to develop intelligent, efficient, responsible and socially-conscious citizens. This demands that each course should really be a course in citizenship; that is, each individual student should acquire in each course not only a knowledge of the subject taught, but also those interests, ideals, habits and powers whereby he may find his place and use that place to shape both himself and society toward ever nobler ends.

Accordingly, this card is a record of the Progressive Development of the Student in Citizenship qualities through the medium of the course indicated on the other side.

Marking will be upon Progressive Development: 1, Excellent; 2, Satisfactory; 3, Fair; 4, Unsatisfactory; 5, Failure. 1 or 2 will be necessary for recommendation to the University; 3, for promotion. Certain qualities contributing to Progressive Development are listed. A check after any quality indicates that improvement is urged.

THE GOAL OF EDUCATION IN A DEMOCRACY

In a democracy, a symmetrical training of the individual is all important. In the high schools of Oakland, the object of our work is to develop intelligent, efficient, responsible and socially-conscious citizens. This demands that each course should really be a course in citizenship; that is, each individual student should acquire in each course not only a knowledge of the subject taught, but also those interests, ideals, habits and powers whereby he may find his place and use that place to shape both himself and society toward ever nobler ends.

Accordingly, this card is a record of the Progressive Development of the Student in Citizenship qualities through the medium of the course indicated on the other side.
