If work like
I'm going to
Italy?!

why is there so much Bureaucracy
in that?

I can't help but feel that none of
this is strictly necessary. I mean,
I've been to Italy, I say fine. I could
go today! I've been to Colombia
& travel's becoming "Normal" (white) I'll
be fine.

ÁLBUM **PLANETA SORPRENDENTE**

136. CHAPOLA COLIBRÍ (*Macroglossum stellatarum*)
De hábitos diurnos, alcanza los 60 km/h y aletea 85 veces por segundo. En Europa, donde no hay colibríes, la confunden con esta ave debido a que sus alas cortas y fuertes le permiten realizar un vuelo sostenido y moverse hacia adelante y hacia atrás. Ha desarrollado una larga espirotrompa para chupar el néctar de las flores.

195. ÁRBOL DEL CACAO (*Theobroma cacao*)
El delicioso chocolate proviene de las semillas del fruto de este árbol originario de la Amazonia, cuyo cultivo extendieron los aborígenes por todo el continente y, tras el descubrimiento de América, llegó al Viejo Mundo. Además de nutritivo, contiene sustancias con efectos estimulantes. La manteca de cacao se usa para tratar heridas y labios cortados.

4. EL SISTEMA SOLAR
Se formó a partir de una nebulosa de polvos y gases que al atraerse, bajo el efecto de la gravitación, se comprimieron y formaron el Sol. La masa de este representa el 98% del total del sistema solar y es por eso que, de acuerdo con las mismas leyes de gravitación de Newton, los demás cuerpos giran alrededor de él: planetas, asteroides y cometas.

INFORMATION FOR TRAVELERS

The International Certificate of Vaccination or Prophylaxis is an official statement verifying that proper procedures have been followed to immunize you against a quarantinable disease which could be a threat to the United States and other countries. The certificate is essential in permitting uninterrupted international travel. IT MUST BE COMPLETE AND ACCURATE IN EVERY DETAIL, or you may be detained at international ports of entry.

Smallpox as a naturally occurring disease has been eradicated; consequently there is currently no recommendation for the routine use of smallpox vaccine for international travel. The requirement for the International Certificate of Cholera Vaccination was removed from the International Health Regulations in 1973. If vaccination against cholera is performed, it can be entered in the Other Immunizations/Prophylaxis Received section.

Certain immunizations may be required by countries; other immunizations and preventive measures are sometimes advisable, depending on the traveler's age, previous immunization status, and the nature and duration of travel. **YELLOW FEVER IMMUNIZATION MAY BE GIVEN ONLY BY A DESIGNATED YELLOW FEVER VACCINATION CENTER.** To locate the nearest Yellow Fever Center, see www2.ncid.cdc.gov/travel/yellowfever/. Other immunizations may be given by any licensed physician or clinic.

There is a risk of acquiring MALARIA when traveling to parts of Central and South America, the Island of Hispaniola (the Dominican Republic and Haiti), Africa, Asia (including South Asia, Southeast Asia and the Middle East), Eastern Europe and the South Pacific. You are strongly advised to seek information from your local or state health department, private physician, or the CDC Travelers' Health website (www.cdc.gov/travel) concerning the need for protection against malaria and for instructions on how the prophylactic drugs should be taken.

It is strongly recommended that persons traveling abroad and those entering the United States be immune from measles by prior disease or vaccination.

If you need medications regularly, take an adequate supply with you. Because of possible serious consequences to your health, do NOT take medications purchased "over the counter" unless you are familiar with the product. Should you need medical assistance, the American Embassy or consulate usually can provide names of physicians or hospitals.
