J.D.E.

Ha.

2
This sign has
always bothered
me, as a hat-wearing
person who frequently
wears a coat, it
seems like the
normals are profil-
ing, me.

Now this one, which
I just saw today,
makes me feel so
much better.
It's so much more
accurate.

Pen & Ink | Sketch: A legend returns

Fountain pens. So old-fashioned, but such a marvelous and sensible invention. In Europe, children learn to write their first cursive letters not with a ballpoint or fiber tip, but with a fountain pen. There's something indescribably wonderful about the feel of the pen in hand and the sensuous ink that mysteriously flows to paper. It's an intimacy that evokes creativity, style and passion.

Thirty years ago the typical eclectic art supply store or fine stationer of New York's Manhattan island offered a particular fountain pen that had a nib with the perfect smoothness and flexibility for sketching, drawing and writing in journals. The pen was luckily affordable, as many artists are often penniless. In spite of its acclaim, this coveted pen would not last. In the changing world of brand domination, big box chain stores and increasingly homogenized product selection, the fortune of the pen's original maker rose and fell, and ultimately this beloved creative tool was gone.

There was nothing quite like that rare, bygone pen that sketched as well as it wrote. But, the dream of bringing back the sketching fountain pen stayed in the mind of a third-generation San Francisco art supplier named Frank Stapleton for all these years.

In Stapleton's quest to resurrect the pen that had eluded a generation of artists, he realized it would require one essential feature. For artists who sketch and doodle in their journals, there is a desire for an indelible India ink over which watercolors can be washed without smearing. Commercially available permanent inks are indelible, true, but they contain shellac, which clogs fountain pens. For the artist, this is a very frustrating deficiency.

Perseverance, clever worldwide sourcing, and ingenuity ultimately converged in Stapleton's quest, and at last the legendary sketching fountain pen is back, ready to inspire and create. Pen & Ink | Sketch preserves the best features of that fabled pen - such as the ultra smooth, long lasting iridium-tipped nibs - and adds all the possibilities that come from a truly indelible, free-flowing fountain pen ink that uses the latest micro-pigment technology.

Storia di un taccuino leggendario

Moleskine è il leggendario taccuino degli artisti e intellettuali europei degli ultimi due secoli: da Van Gogh a Picasso, da Ernest Hemingway a Bruce Chatwin. Compagno di viaggio tascabile e fidato, ha custodito schizzi, appunti, storie e suggestioni prima che diventassero immagini famose o pagine di libri amati.

Prodotto in origine da piccole manifatture francesi che fornivano le cartolerie parigine frequentate dalle avanguardie internazionali, alla fine del secolo scorso divenne introvabile: nel 1986 era scomparso anche l'ultimo produttore, un'azienda familiare di Tours. 'Le vrai Moleskine n'est plus', questo il lapidario annuncio della proprietaria della cartoleria di Rue de l'Ancienne Comédie dove si riforniva Chatwin. Lo scrittore inglese ne aveva ordinati cento prima di partire per l'Australia: comprò tutti i Moleskine che riuscì a trovare, ma non furono abbastanza.

Nel 1998, complice un piccolo editore milanese, Moleskine è finalmente tornato. Anonimo custode di una straordinaria tradizione, ha ripreso il suo viaggio. Cogliere la realtà in movimento, catturare dettagli, segnare sulla carta l'unicità dell'esperienza: Moleskine è un accumulatore di idee e di emozioni che libera la sua carica nel tempo.

Il leggendario taccuino nero torna a passare da una tasca all'altra per accompagnare con le diverse campiture della sua pagina, i mestieri creativi e l'immaginario del nostro tempo. L'avventura di Moleskine continua, il seguito lo racconteranno le sue pagine ancora bianche.

Histoire d'un carnet légendaire

Moleskine est le carnet légendaire des artistes et des intellectuels européens de ces deux derniers siècles: de Van Gogh à Picasso, d'Ernest Hemingway à Bruce Chatwin. Compagnon de voyage de poche et de confiance, il a conservé les esquisses, les notes et les suggestions avant qu'elles ne deviennent des images célèbres ou des pages de livres que nous avons aimés.

Produit à l'origine par de petites manufactures françaises qui fournissaient les papeteries parisiennes fréquentées par l'avant-garde internationale, il devint introuvable à la fin du siècle dernier: en 1986 le dernier fabricant, une entreprise familiale de Tours, avait lui

LITHO IN U.S.A.

Pen & Ink | sketch

Pen Care

Clean the nib and converter before each filling or if the pen has not been used in several weeks. Always use fresh Pen & Ink|Sketch pigmented ink. Any fountain pen ink will evaporate over time, become thick, and may clog your pen. Clean your pen nib by flushing cold water through the nib section using the converter. Avoid washing with hot water or alcohol. If the nib has visible signs of dried ink, use a solution of two-thirds cold water and one-third household ammonia. Fill the converter with the solution and flush the pen several times, then repeat with cold water to remove the solution. If the nib is clogged with ink, soak it in cold water for 24 hours. Pen & Ink|Sketch pigmented ink is water-soluble, so allow the nib to dry thoroughly before filling again with ink.

Storing Your Pen

When not in use, store your fountain pen in an upright position. Storing your fountain pen on its side or upside-down may cause the ink to dry and eventually clog the pen.

Travel Precautions

When traveling by plane, carry your fountain pen with the nib up. To prevent air pressure from forcing ink through the nib, the ink cartridge should be completely filled or left empty.

A Note on Ink: Shellac & Cartridges

ONLY USE non-shellac based inks in this and other fountain pens as shellac causes clogging. The international standard short fountain pen ink cartridges (1-1/2" in length) available in most fine stationery stores will work fine with the Pen & Ink|Sketch pen, although their ink is not indelible. DO NOT use cartridges designed for the following pens: Parker, Namiki, Cross, Sheaffer and Waterman Phileas.

The history of a legendary notebook

Moleskine is the legendary notebook used by European artists and thinkers for the past two centuries, from Van Gogh to Picasso, from Ernest Hemingway to Bruce Chatwin. This trusty, pocket-size travel companion held sketches, notes, stories and ideas before they were turned into famous images or pages of beloved books.

Originally produced by small French bookbinders who supplied the Parisian stationery shops frequented by the international avant-garde, by the end of the twentieth century the Moleskine notebook was no longer available. In 1986, the last manufacturer of Moleskine, a family operation in Tours, closed its shutters forever. "Le vrai Moleskine n'est plus" were the lapidary words of the owner of the stationery shop in Rue de l'Ancienne Comédie where Chatwin stocked up on the notebooks. The English writer had ordered a hundred of them before leaving for Australia: he bought up all the Moleskine that he could find, but they were not enough.

In 1998, a small Milanese publisher brought Moleskine back again. As the self-effacing keeper of an extraordinary tradition, Moleskine once again began to travel the globe. To capture reality on the move, pin down details, impress upon paper unique aspects of experience: Moleskine is a reservoir of ideas and feelings, a battery that stores discoveries and perceptions, and whose energy can be tapped over time.

The legendary black notebook is once again being passed from one pocket to the next; with its various different page styles it accompanies the creative professions and the imagination of our time. The adventure of Moleskine continues, and its still-blank pages will tell the rest.

QUALITY CONTROL N° 8213

Every notebook is handmade and it has been carefully checked for quality. If, despite our best efforts, we have overlooked a defect of any kind, please let us know. Send an e-mail to: info@moleskine.com, and include a digital photo that shows the problem you found, the quality control number (that identifies the notebook in your hands) shown here, along with the model name and your mailing address. We will send you a new notebook. Together, we can prevent mistakes in the future. Thank you.
