

TIMOR

Founded in 1923 in the prestigious watchmaking city of La Chaux-de-Fonds, Switzerland, Timor has long been celebrated for its commitment to precision and craftsmanship. As a distinguished member of the "Dirty Dozen," the brand supplied robust, reliable watches to the British military during World War II, each piece crafted to withstand the rigours of war with exemplary performance. This historical excellence sets the stage for Timor's current offerings.

Today, Timor masterfully blends its rich heritage with modern technology, reissuing iconic models that resonate with both collectors and new enthusiasts. These timepieces not only pay homage to their storied past but also showcase the brand's ongoing dedication to quality and durability. Timor's latest collection invites you to own a piece of watchmaking history, meticulously updated to meet contemporary standards and lifestyle demands. Join us in celebrating a legacy of precision that continues to tick flawlessly into the future.

ARMY TRADE PATTERN

Timekeeping has long been of vital importance to the military. That is why the British War Office decided to develop the first general-purpose military wristwatch. These would replace the various pocket watches, and homemade trench watches most soldiers used. They asked the best watch companies of the day to manufacture them under the Army Trade Pattern. The first watches were issued in 1939, just in time for the outbreak of World War II. Only six years later, ATP watches were replaced by the Wrist, Watch, Waterproof. However, due to its popularity, the ATP remained in service until 1957.

WRIST, WATCH, WATERPROOF

When the British War Office needed a wristwatch that could withstand the hellish rigours of World War II, they turned to twelve prestigious watch manufacturers. The Timor Watch Company was among the twelve now known as the Dirty Dozen. We were given a simple brief, and yet derived one of the most iconic military timepieces ever issued. These watches set the bar for all military watches.

A MODERN WATCH WITH HISTORY

The 100M is a modern field watch that marries contemporary design with our rich heritage of watch-making. This watch draws inspiration from the time-honored tradition of military timepieces, like the WWW and ATP. Those watches were designed to meet the rigorous demands of wartime, and so our 100M embodies the robust and reliable spirit of its predecessors. It features cutting-edge technology and materials, tailored to the needs of today's military personnel and outdoor enthusiasts. This watch is not just a tool, but a tribute to the enduring legacy of precision and durability in military timekeeping.
